Gas Expense - \$100.
\$594.00 Food and Drink extra, of course

New Freshies at Targhee

Targhee has received 81 inches. Working base
Of 37 inches.

We will caravan up to Jackson via the 15 to Salt Lake, head east on 80 and then head north on 189 to Jackson through the Green River Valley. Should see Elk, Deer, Gray Wolves, and occasionally, a Bald Eagle. We might stop along the way and make some coffee, and look at nature.

It might take about 12 hours to drive up. Can be made in 10 hours with normal stops. We will stop often to take pictures at famous sites like the Barn up above.

Eat a picnic lunch and have snacks at different stops along the way.

We can drive over to Targhee if we want. They already have had 79 inches with 36 inches remaining.

Jeff knows these mountains intimately as he has skied them for over 30 years.
